

FABRIC Workshop

“Wireless dynamic charging for FEVs: Challenges & Concepts”

February 2, 2016 || Brussels, Belgium

Invitation - Save the Date!

Athens, 19 November 2015

Dear Sir/madam,

The FABRIC consortium (<http://www.fabric-project.eu/>) is glad to invite you to the Workshop on “Wireless dynamic charging for FEVs: challenges and concepts” that will be held on February 2nd, 2016, in Brussels, Belgium.

FABRIC (<http://www.fabric-project.eu/>) is a Large Scale Integrated project, co-funded by the EU's 7th Framework Programme for research, technological development and demonstration that runs from 2014 through 2017. The project is implemented by 23 partners from 9 European countries, including OEMs, suppliers and service providers from the automotive, road and energy infrastructure domains and research organisations. The FABRIC consortium is studying the technological feasibility, economic viability and socio-environmental sustainability of dynamic on-road charging of electric vehicles with the final objective to provide a pivotal contribution to the evolution of electromobility in Europe.

By attending this workshop, you will be able to network with project partners and other leading experts in the area of electromobility. You will discover the State of the Art on ICT tools used in R&D areas that are expected to play a major role in the development of robust, efficient and user friendly wireless charging technology and the lessons learnt from the development of wireless dynamic or stationary charging prototypes. Standardisation and policy issues will be also addressed, while issues that delay market deployment will be thoroughly discussed. In parallel, a demo and poster session will take place, showcasing the project evolutions and technologies.

This is a first 'Save the Date' invitation for every interested person. Participants will include OEMs, public authorities, infrastructure companies, academia, ICT solution providers, Energy providers, Charging solution providers, Road Operators, Grid Operators, Distribution System Operators, Urban Transport City Companies, etc. Please reserve your participation by filling in the attached registration form and send it via email to Mrs. Evi Brousta, ICCS (p.brousta@iccs.gr) by **20 January 2015**.

Don't miss this event - save the date and register. We will be more than pleased to welcome you in Brussels, on February 2016.

Additional information and details on the program will follow shortly.

Yours faithfully,

Dr. Angelos Amditis

FABRIC project Coordinator

Institute of Communication and Computer Systems
