Disclaimer:

UDRIVE is co-funded by the European Commission, DG Research and Innovation, in the 7th Framework Programme. The contents of this publication is the sole responsibility of the project partners involved in the present activity and do not necessarily represent the view of the European Commission and its services nor of any of the other consortium partners.

Executive Summary

UDRIVE is a large-scale European Naturalistic Driving study that aims to collect in-depth knowledge about the behaviour of car drivers, truck drivers and motor riders in order to make road traffic safer and more environmentally friendly.

Deliverable D63.9 Concise overview of main results of the project has been created in a form of an online website showcasing the main results as highlights. The results are divided in six different sections as below:

Vulnerable Road Users (VRU), Distraction, Eco-driving, Risky behaviour and Data collected & exploitation.

More information is available for each of the listed highlights as well as a list of supporting deliverables.

The Compendium has been made as a website in order to reach most possible audience and to provide a user friendly way of seeking for information through the search link.

The Compendium is available via this link: <http://results.udrive.eu/>
