

EGNSS4RPAS webinar: EGNOS and Galileo powering drone operations

In the frame of the European Commission project – Support to standardisation actions for EGNOS & Galileo in Drones/RPAS/UAVs

When?

Wednesday, 3rd July 2019
10h00 – 11.30
90 minutes (incl. Q&A)

Who?

Anyone interested in knowing more about benefits of using EGNSS for drone use cases

During the webinar, the following questions will be addressed:

Topics

- What are Galileo & EGNOS?
- Why is there a need for standardisation?
- What is the EGNSS4RPAS project about?
- Which trial results have been achieved?
- What are the technical performances of EGNSS?
- What are the relevant drone use cases?
- How are drones used in real life, now?
- How much it cost to implement EGNSS?
- What is the EGNSS value proposition?
- Which are the European Commission's future activities?
