

COMING SOON

5GMOBIX Final Event

13-14 September 2022

CTAG, Porriño / International Bridge Tui-Valença
Spain-Portugal

5G-MOBIX matched the benefits of 5G connectivity with Connected Automated Mobility (CAM) services and functionalities in cross-border conditions across the EU, in Turkey, China and Korea.

Join us to learn more about 5G-MOBIX final results and lessons learnt. Come experience static & live demonstrations from all trial sites and cross-border corridors.

The first day will have a more technical focus and will provide the opportunity to interact with the project experts on the detailed outcomes of the trials.

The second day will target the press, public and high-level stakeholders.

Stay tuned for further details regarding the programme and registration.

In case of any question, contact: comms@5g-mobix.com

This project has received funding from the European Union's Horizon 2020 Research and Innovation programme under grant agreement No. 825496.
