4th European Conference on Connected and Automated Driving

The **European Commission**, together with the European Partnership on Connected, Cooperative and Automated Mobility (CCAM) and the **FAME** project[1], are pleased to announce the 4th European Conference on Connected and Automated Driving (**EUCAD2023**), which will take place in Brussels on **3** and **4 May 2023**.

In line with the **European Green Deal** and the **Sustainable and Smart Mobility Strategy**, it is the ambition of the European Commission to leverage the digitalisation of transport with climate-neutral objectives to make transport **smarter**, **safer**, and more **sustainable**. Innovative solutions like **Connected, Cooperative and Automated Mobility** are helping to achieve these green and digital priorities, offering affordable, user-oriented, and inclusive shared mobility concepts for passengers and for goods.

EUCAD2023 will gather **political leaders** from the **European Commission** and **Member States** with European and international **high-level representatives** of **industry**, **academia** and **road authorities** to discuss if our societies are ready for the deployment of **smart, inclusive and sustainable mobility solutions**.

Debate, **develop** and **deploy**! EUCAD203 will:

- Take stock of latest **research**, **policy**, and **regulatory developments** in the field of CCAM;

---

[1] FAME is a research and innovation action funded by the European Commission's Horizon Europe framework programme, aimed at building consensus across stakeholders from all sectors for a sound and harmonised deployment of CCAM in Europe.

- Demonstrate **European projects** and recent **R&I results** to support the market uptake of CCAM solutions;
- Allow major road transport stakeholders to participate in active debates and identify **challenges**, **needs** and **synergies** towards the deployment of CCAM;
- Provide input to the **Strategic Research & Innovation Agenda** of the CCAM Partnership to reflect latest R&I priorities and strategic objectives, to make CCAM a reality.

Participants will enjoy a mix of high-level policy sessions and thematic technical sessions to discuss the most recent technological developments, policies and R&I activities in the area of CCAM. An exhibition with exciting European and national projects will be accessible during a networking reception at the Autoworld Museum on the evening of **3 May 2023**.

Want to shape the event with us? Share your ideas here!

Registration to the conference is **free** and opens in early **2023**.

Stay tuned and follow us !
